The Higgs boson is an elementary particle in the Standard Model of particle physics, produced by the quantum excitation of the Higgs field, one of the fields in particle physics theory. It is named after physicist Peter Higgs, who in 1964, along with five other scientists, proposed the mechanism which suggested the existence of such a particle. Type or paste a DOI name into the text box. Click Go. Your browser will take you to a Web page (URL) associated with that DOI name. Send questions or comments to doi ... After writing a research proposal you will need to write the research paper. This lesson offers a shortened example of the research paper with an explanation of what it does well. Citing and more! Add citations directly into your paper, Check for unintentional plagiarism and check for writing mistakes.
