

Download Anthropology Of Music

Anthropology is the study of what it means to be human: from the study of culture and social relations, to human biology and evolution, to languages, to music and art, and to vestiges of human habitation. Anthropology contributes to a multidisciplinary understanding of the human condition through study of human biological, cultural, and linguistic variation. Our faculty and students engage with and contribute to current anthropological scholarship. We explore topics such as historical anthropology and archaeology, colonialism, space and landscape, race, nature culture, and materiality.
