Learn specific teaching strategies that challenge children with ADD by presenting them with interesting activities designed to improve behavior and learning, while simultaneously providing them the support they require. Attention deficit hyperactivity disorder (ADHD) is a mental disorder of the neurodevelopmental type. It is characterized by difficulty paying attention, excessive activity, and behavior without regards to consequences which is not appropriate for a person's age. Is it hard for your child to sit still? Does your child act without thinking first? Does your child start but not finish things? If so, your child may have attention deficit hyperactivity disorder (ADHD). Printer-friendly Version: Every year the National Information Center for Children and Youth with Disabilities (NICHCY) receives thousands of requests for information about the education and special needs of children and youth with Attention-Deficit Disorder (ADHD, ADD/ADHD).
