A diving watch, also commonly referred to as a diver's or dive watch, is a watch designed for underwater diving that features, as a minimum, a water resistance greater than 1.0 MPa (10 atm), the equivalent of 100 m (330 ft). DAN Membership. DAN is your dive safety association. Join more than 230,000 of your fellow scuba divers who have already decided to become members. Scuba diving does involve some risk and some medical conditions can make the risk of death while diving much higher. As a result, the regulations, requirements and medical standards relating to diving in Australia are amongst the strictest in the world, in order to ensure that Australia continues to be one of the safest places to dive in the world.
