

Download Circle String Art Patterns With Instructions

Spirelli string art is said to have originated from stitching on cards that was discovered by Mary Everest Boole in the late nineteenth century. It is created by winding a thread or string around a die cut shape. Today let's put aside the worksheets and try a fun way to help kids learn math: through art and design. A hands-on art project that incorporates mathematical concepts is a great way to introduce kids to ideas like geometry and fractions. In today's project we'll be using string art to create a stunning geometric geode inspired circle weaving art project for elementary students! Come take a look at how we made them in our children's art studio! Creating a DIY string art board is a relatively easy craft that results in a beautiful piece of art. With just a hammer, nails and some Dollar Store string, you can create a stunning addition to your decor!
