

Download Course 1 Fundamentals Of Accounting

This course is designed to provide a basic understanding of financial statements with an emphasis on the balance sheet. However, to understand accounting driven financial statements, it is important to recognize that accounting is less about counting and more about measuring. This module provides a broad introduction to accounting study at university level. It covers the fundamentals of financial and management accounting as well as the essential skills, knowledge and ethics required to be a professional accountant. Learn Managerial Accounting Fundamentals from University of Virginia. This course will teach you the fundamentals of managerial accounting including how to navigate the financial and related information managers need to help them make decisions. ...Accounting uses financial information from the past to make decisions in the present to change the future. This course provides an introduction to the four basic types of accounting—bookkeeping and financial, managerial, and tax accounting—and explains the links between accounting, decision-making, business performance, and financial health.
