

# Download Earths Atmosphere Section One Answer Key

Earth is the third planet from the Sun and the only astronomical object known to harbor life. According to radiometric dating and other sources of evidence, Earth formed over 4.5 billion years ago. After yesterday's post about what determines temperature, I thought I would revisit one of the most convincing evidences of Earth's greenhouse effect. Scores like this are not uncommon. The reading section within the PTE Academic is the section that most people find difficult in the exam. At the top of the North Pole, the sun never sets, and I showed the video for that, and also quoted the scientific sources for that.
