

Download Electronics For Guitarists

The Henriksen The Bud guitar amplifier is an exceptional amp, the culmination of work by the late Bud Henriksen in designing tools specifically for Jazz guitarists. The guitar is a fretted musical instrument that usually has six strings. It is typically played with both hands by strumming or plucking the strings with either a guitar pick or the finger(s)/fingernails of one hand, while simultaneously fretting (pressing the strings against the frets) with the fingers of the other hand. Rocktron is a manufacturer of electronic signal processing equipment for guitar and bass including the legendary HUSH noise reduction, guitar preamps, rack effects, MIDI controllers, amplifiers, stomp box pedal effects, wah & expression pedals, floor effect. William Laskin is very well known for the creativity and quality of his inlay work. Here, a stag or buck – a male deer with antlers is depicted between frets 11 and 18, in a mixture of engraved woods and, it appears, ivory for the antlers.
