

Download Fire-fighting Hydraulics

A total hydraulics service based on expertise built through an in-depth practical experience accumulated over many years of hydraulic system service to operators throughout the UK, Europe and Worldwide. Hycos also produces mobile fire fighting systems for several applications. In building these, we can often use our extensive experience in hydraulics as well in various other pumping systems. PT Hydraulics Australia has been in operation for over 35 years, delivering market leading products backed by the service and support our customers deserve. We are divided into four core business units - PT Industrial, PT Rescue, PT Rail and PT Hire. Here at our warehouse we stock a large range of hydraulic hose, fittings and adaptors, we also stock a large number of hydraulic oils, lubricants and quick release couplings, steel tube, compression fittings, flanges, valves and a full range of hydraulic components to suit your application.
