

Download Gale Encyclopedia Of Genetic Disorders

The following is a list of genetic disorders and if known, type of mutation and the chromosome involved. Although the parlance "disease-causing gene" is common, it is the occurrence of an abnormality in these genes that causes the disease. Vaughan Public Libraries subscribe to a number of high-quality electronic databases providing a wealth of information on a wide range of subjects! Neurodevelopmental disorder is a mental disorder. A narrower use of the term refers to a disorder of brain function which affects emotion, learning ability, self-control and memory and which unfolds as the individual grows. Stress is defined as an organism's total response to environmental demands or pressures. When stress was first studied in the 1950s, the term was used to denote both the causes and the experienced effects of these pressures.
