

# Download Howard Hughes And Twa

Howard Robard Hughes Jr. (December 24, 1905 – April 5, 1976) was an American business magnate, investor, record-setting pilot, engineer, film director, and philanthropist, known during his lifetime as one of the most financially successful individuals in the world. Howard Hughes (left), 1944. 1996-1999 Lockheed Martin Corporation; During World War II, Hughes's focus turned to military aircraft, and his company had several government contracts, notably for the Hughes XF-11 and the H-4 Hercules. Most assumed he wanted the money to go to the Howard Hughes Medical Institute. It was well-known that he didn't want the money falling into the hands of any distant relatives, but without hard evidence, distant cousins and others began snatching for the cash. His father was the inventor of the "Hughes Rock Eater," a self-sharpening drill bit used for drilling oil wells that is still in use today. Hughes inherited several million dollars but earned the vast majority of his wealth from his own business ventures.
