

Download Industrial Residuals Management (water Science & Technology)

Summary of information collected by EPA to assess drinking water treatment plant (WTP) discharges of treatment residuals to surface water. Includes technical and financial information about WTPs based on a national survey, site visit reports and literature review. Journal description. Water Research publishes refereed, original research papers on all aspects of the science and technology of water quality and its management worldwide. Effluent Guidelines are national standards for industrial wastewater discharges to surface waters and publicly owned treatment works (municipal sewage treatment plants). We issue Effluent Guidelines for categories of existing sources and new sources under Title III of the Clean Water Act. The Analytical Support for CCR Sites. On April 17, 2015, EPA published the final rule on the disposal of CCR for electric utilities, establishing the nationally applicable criteria for the safe disposal of CCR.
