Game theory is the study of mathematical models of strategic interaction between rational decision-makers. It has applications in all fields of social science, as well as in logic and computer science. This paper applies a value-based management framework to critically review empirical research in managerial accounting. This framework enables us to place the exceptionally diverse set of managerial accounting studies from the past several decades into an integrated structure. On StuDocu you find all the study guides, past exams and lecture notes you need to pass your exams with better grades. Study.com has been an NCCRS member since October 2016.
