

Download Nace Corrosion Technician Course Manual

NACE International equips society to protect people, assets and the environment from the adverse effects of corrosion. The CP 2 – Cathodic Protection Technician course provides intermediate-level training in both theoretical knowledge and practical techniques for testing and evaluating data to determine the effectiveness of both galvanic and impressed current CP systems and to gather design data. NACE-CP1-001 Exam Preparation Guide—Mar 2018 | 3. Introduction. The Cathodic Protection Tester (CP 1) written exam is designed to assess whether a candidate has the ADVANCED. This course covers a combination of theory and practical information presented on an engineering or advanced technician level, to help round out the education of experienced personnel with over 4 years of corrosion experience.
