

# Download Our Renewable Future Laying The Path For One Hundred Percent Clean Energy

January is the perfect time to begin anew. Now winter sets in with all its force, and that makes us wince and grit our teeth. We limit our outdoor time; we dress warmly with long underwear, gloves, caps and proper footwear. Straight Up America's Fiercest Climate Blogger Takes on the Status Quo Media, Politicians, and Clean Energy Solutions (by Joseph J. Romm) In Straight Up, physicist and climate expert Joseph J. Romm explain the dangers of and solutions to climate change---frank thoughts that you won't find in newspapers, in journals, or on TV. Pumped hydro is an extension of the concept of using the water in the reservoir as stored energy. Operating much like a dam, it also has the ability to pump water from downstream back into the reservoir for use in future when power demand is greater. The technology behind lab-cultured meat products is rapidly advancing. When we start seeing these kinds of products being sold right alongside their traditionally farmed cousins, we should look more at the contentious topic of the impact livestock farming has on the environment.
