

Download Psychology Psychological Disorders Study Guide

Psychology is the science of behavior and mind (not to be confused with neuroscience, which studies the neural underpinnings of psychological phenomena). Psychology includes the study of conscious and unconscious phenomena, as well as feeling and thought. Debriefing is the procedure that is conducted in psychological research with human subjects after an experiment or study has been concluded. It involves a structured or semi structured interview ...Psychology is an extraordinarily diverse field with hundreds of career paths. Some specialties, like caring for people with mental and emotional disorders, are familiar to most of us. Psychology is the scientific study of how we think, feel and behave. In this lesson, you'll get an overview of the five main approaches that have guided modern psychological research.
