A colourful palette Pigments are considered to be the chief constituent of an ink and contribute about 50 per cent of its cost. A pigment is essentially any particulate solid - coloured, black, white or fluorescent - that alters the appearance of an object by the selective absorption and/or scattering of light. The Pure and Applied Macromolecular Chemistry Group (Macro Group UK) is a joint interest group of the Royal Society of Chemistry and the Society of Chemical Industry. Aluminium is used in a huge variety of products including cans, foils, kitchen utensils, window frames, beer kegs and aeroplane parts. This is because of its particular properties. Glossary. Group A vertical column in the periodic table. Members of a group typically have similar properties and electron configurations in their outer shell.
